

Dear Doctor,

I am writing to advise that Dimboola Guardian Pharmacy continues to manufacture Melatonin as sublingual drops available on prescription and now has a substantial rise in customers requiring this product. A big thank you if you have prescribed it before.

Please note that, if wished, your staff can email or fax these Melatonin scripts direct to the pharmacy with the customer contact phone number.

We have a regular supply service to Horsham with collection at Des Lardner's Organic, or daily posting of the product direct to the patient.

If you require any further information about this process or about the product please don't hesitate to contact me,

Des Lardner
